

SHOULD YOUR COMPANY ADOPT CLOUD ASSET MANAGEMENT?

Incorporating the maintenance, compliance, upgrading, and disposal of cloud assets, Cloud Asset Management keeps track of every aspect of your cloud estate.

83% of enterprise workloads will be in the cloud by end of 2020

Forbes

76% of firms feel their cloud projects performed better, especially when it came to delivering an immediate cost reduction.

Refinitiv's Public Cloud Investment Barometer Report

CLOUD ASSET MANAGEMENT BENEFITS INCLUDE:

- Inventory accuracy and asset tracking
- Automation and data centralization
- Time and cost efficiency
- Better decision making

With benefits and results like that, there's almost no question that cloud adoption rates will continue to rise.
